Lecture on Nanotechnology in Horticulture and Functional Properties of Ferrites

On 22nd Dec. 2021, online seminar was organized on Functional Properties of Ferrites by the Department of Physics, Career Point University, Himachal Pradesh. The keynote speakers of this seminar on Ferrite Technique were Prof. (Dr.) Gagan Kumar from Chandigarh University, Punjab and Dr. Monika Sharma from YS Parmar University, Solan. Dr. Gagan said in his address that people were enriched by many new facts related to ferrite. He said that ferrites are technically important because they have both electrical and magnetic properties. Therefore, ferrite is used in the manufacture of magnetic electronics and micro devices. Their high electrical resistivity, negligible dielectric heat permeability, ease of manufacture, low cost, etc. Important properties of ferrites make them useful for applications. In the second session, Dr. Monika Sharma delivered a lecture on Nanotechnology in Plant Disease Management. She shared her views about Agro Nanotechnology in Horticulture and how many technology helps in the detection of plant diseases. The seminar was attended by students from the university as well as from other universities, such as Solan University, Chandigarh University and Srisai University. On this occasion Dean Academics Prof. (Dr) K L Verma and Prof. (Dr) Naveen Thakur also attended the seminar as the chief guests. Dr. Indu Sharma, Head of Department of Physics thanked all the guests and other dignitaries who had come to the seminar.
